先修課程 Pre-requisite courses				
課程目標 Course Objective		This course covers a broad range of topics in Microeconomics, including consumer and producer decision-making in competitive markets. It also explores key concepts in industrial organization theory and examines how externalities and public goods are addressed within the framework of microeconomic analysis. In addition, the course introduces selected topics such as income distribution in the labor market and environmental economics. The primary goal is to equip students with a solid foundation in microeconomic theory, with an emphasis on analyzing policy issues in markets from both positive and normative perspectives.
