Course Description

This course probes the possibility of transformation and empowerment through *adult learning environment*. First reviewing transformative learning theory, the course proceeds to perspectives on adult education, the awakening of critical consciousness, network of learning resources, adult learning and educator's role in transformative learning, then discusses how transformative learning occurs among learning communities in various venues, including arts-based programs and leadership development in the higher education sphere, adult basic education and communicative courses in workplaces, and other special learning groups.

Course Goal

The purpose of this course is to help students develop knowledge on adult learning and understanding of how learners achieve change of mentality and empowerment of life in the process of learning. In addition to studying cases of the best practice in a global context, students have a chance to demonstrate and analyze similar situations in their home areas, compare with the cases discussed in class, and seek possible solutions for future improvement, hence acquire practical knowledge on the process of transformative learning through community. Students are also encouraged to cultivate abilities of independent analysis and critical thinking from a leader's perspective, with resources management and educational planning in a multicultural environment.

Assessment

10% for participation (*attendance, punctuality*, and class discussion)

30% for assignments on weekly readings

30% for presentation

30% for term paper

***During class, including lectures, discussions, and student presentations, students may use electronic devices only for course-related learning activities. Please refrain from using electronic devices for purposes unrelated to the course.**

Assignment & evaluation criteria

1. Weekly reading

During *weeks 2 to 11* (except holidays), students should hand in a 300-word essay on the reflection question based on the assigned reading every week in WORD or PDF, and upload on CCU ecourse2 no later than *the Friday* prior to class. Evaluation criteria: (a) reflection (40%); (b) criticism and questions (40%); (c) timeliness and conciseness (20%).

2. Oral presentation

In *week 3* students will select their cases for presentations during *weeks 12-16*, then presenting on a weekly basis. The presentation should be on slides including background information and theoretical review, analysis of this case and comparison with similar cases in the student's home area or elsewhere worldwide, reflection and feedback, and discussion questions or activities. Presentation slides should be uploaded on CCU ecourse2 no later than *the Friday* prior to class. Each presenter will give oral report for one hour, and lead discussion for another half. Evaluation criteria: (a) case background and theoretical review (10%); (b) analysis and comparison (30%); (c) reflection and feedback (30%); (d). discussion questions or facilitation of activities (20%); (e) timeliness, content organization and presentation skills (10%).

3. Term paper

In *week 5* students will briefly report their decision on the selected topic for term paper, which should correspond to the topic chosen for your oral presentation. It should be extended by incorporating comparable cases from other contexts or regions. The paper should include an introduction providing relevant background information, a review of relevant theories and literature, analyses and reflections on the selected cases, and a conclusion proposing a model of best practice. This assignment accounts for 30% of the final grade and will be assessed based on the following criteria: (a) introduction and literature review (20%); (b) analysis and comparison of cases with reflection (40%); (c) feedback, extended issues, and proposed model of best practice (30%); (d) timeliness and paper format (10%).

Academic integrity and the use of AI

Academic misconduct including plagiarism may result in failing the course and further penalties. Avoid using other's words, ideas or products without giving proper credit to the original author.
