Course Description:

This course focuses on how companies invest in real assets (**investment decision**) and how they raise the money to pay for these investments (**financing decision**). It is organized in five parts. Part 1 (Chapters 1-4) provides essential background material. Part 2 (Chapters 5-10) is concerned with valuation. Part 3 (Chapters 11-13) discusses the cost of capital. Part 4 (Chapters 14 and 15) begins our discussion of the financing decision. Part 5 (Chapters 16 and 17) focuses on the two classic long-term financing decisions: debt and payout policy. This course is a full year program. In the first semester, Parts 1 and 2 will be covered.
