| 課　程　概　述 | This course introduces a range of philosophical topics and debates in moral psychology, such as: What is moral motivation? Do reasons for action always depend on desires? Is emotion or reason at the heart of moral judgment? Under what conditions are people morally responsible? Are there self-interested reasons for people to be moral? It presents research by philosophers and psychologists on these topics, and addresses the overarching question of how empirical research is (or is not) relevant to philosophical inquiry. | | |
